

FIRST READ

The Strike Brief

Series A · \$25–50M · \$150–250M pre-money

A probability field just collapsed in our favor.

Nirmata Holdings. One chess engine. Three games on the same board. ATOM (revenue) · AntimatterAI (moat) · ANS (long position) · PhysioPS / HumanOS (vertical).

\$3.2M	\$1.8M	87%	Y3 (2028)
BRIDGE CLOSED	Q2 TCV BOOKED	CONVERGENCE DIAL	UNICORN THRESHOLD

01 / THE PROBABILITY COLLAPSE

Five Vectors Converged. The Window Is Open.

87% — LAUNCH WINDOW OPEN

Weighted composite across macro, buyer, capital, stack, and competitive gap. Every input is independently citable. The window is open. It will not stay open.

"The estimates of how much liquidity drain [SpaceX, OpenAI, Anthropic IPOs] could represent is about \$200 billion."

— Wei Li, BlackRock Global CIO — Khaleej Times, May 28 2026

02 / THE HOLDING

One Board. Three Games.

Nirmata Holdings is structured as a holding because three game-clocks are different — and shared infrastructure, shared models, and shared founder judgment make the structure the moat.

GAME	ASSET	TIME HORIZON	WHY IT WINS
NEAR (cash)	ATOM — Revenue AI OS	Q2 2026 → Q4 2027	Outcome pricing; 12-tool consolidation
MID (moat)	AntimatterAI Core	2027 → 2029	Agentic OS; categorical comp set
LONG (infra)	ANS — Antimatter Network Svc	2027 → 2030+	Federated edge; 86% hyperscaler savings
VERTICAL	PhysioPS / HumanOS	2027 → 2030+	Clinical-grade ANS; \$36B+ RPM

03 / THE FOUR PILLARS

The Operating Layer

PILLAR 01

AntimatterAI Core

The agentic operating layer of the modern enterprise. Not a chatbot. Not a tool. The infrastructure that makes AI think, act, and govern itself.

OPEN LIVE DEMO → <https://antimatterai-investor-pitch.vercel.app/#/>

PILLAR 02

ATOM Sales Dominator

Autonomous revenue production. Voice-first AI that prospects, pitches, handles objections, and closes — at human speed, machine scale. Copious enterprise deals in active close; demand is staggering.

OPEN LIVE DEMO → <https://atom-dominator-pro.vercel.app/#/>

PILLAR 03

ATOM Red Team

AI governance, adversarial testing, hardening. The compliance backbone for AI-native enterprises. EU AI Act ready · SOC2 / FedRAMP / NIST AI RMF. Copious deals in regulated industries — defense, finance, healthcare.

OPEN LIVE DEMO → <https://dtom-red-team-command-interface.vercel.app/>

PILLAR 04

PhysioPS / HumanOS

Clinical-grade Autonomic Nervous System intelligence. Real-time ANS health via HRV + photoplethysmography. Built for F1 teams, elite athletes, veterans, and aerotoxicity recovery. Pre-orders and clinical trial partnerships accumulating.

OPEN LIVE DEMO → <https://physiopshumanoslifestyleguide.vercel.app/>

04 / THE CONVERGENCE DIAL

87% — Why Now Is The Window

Gartner (May 2026): \$2.59T global AI spend in 2026, +47% YoY — the fastest tech spending growth in history. AI agent software alone: \$206.5B in 2026.

Morgan Stanley (May 2026): Hyperscaler capex ~\$805B in 2026 (nearly double 2025), \$1.1T forecast for 2027.

McKinsey (Nov 2025): 88% of organizations use AI in at least one function (up from 78%); 62% experimenting with AI agents.

BlackRock CIO Wei Li (May 2026): \$200B liquidity drain from SpaceX + OpenAI + Anthropic IPOs.

BofA Fund Manager Survey: 3.9% cash — lowest since Feb 2024 — contrarian sell signal triggered.

Gartner CFO Agenda 2026: 56% of CFOs rank cost reduction as #1 strategic priority.

\$2.59T	\$805B	88%	3.9%
GARTNER 2026	MS HYPERSCALER	MCKINSEY ENTERPRISE	BOFA CASH (SELL)

05 / THE DEMAND CURVE

Copious Deals. Staggering Pipeline.

We do not pitch hypothetical demand. We pitch booked TCV and disciplined pipeline. The numbers below are audit-defensible — we report TCV and contracted ARR with cohort data, not blended pilot revenue.

METRIC	STATUS
ATOM Professional deals at \$25K/mo	2 deals closing Q2 2026 (\$1.8M TCV combined)
Bridge + founder capital	\$3.2M closed and fully deployed
Enterprise pipeline — ATOM	Copious; demand is staggering
ATOM Red Team — regulated industries	Defense, finance, healthcare engaged
PhysioPS — pre-orders + trial partners	Accumulating; Steve O'Leary leading
AntimatterAI Core — active pilots	Multi-product enterprise engagements
Voice agent TTFB	~300ms (Hume EVI 3) — production
Software-trio gross margin	83% (Sales Dominator + ATOM + Red Team)
Blended Y1 gross margin	67% (including services + clinical)

06 / THE RIGHT PARTNER

Templeton–Class Operator DNA

We are looking for partners whose operating DNA matches the three-game compound we are running. The Templeton-class profile — operator-investor, infrastructure fluency, GTM rigor, governance posture — is the lane we are filling on the cap table.

PARTNER PROFILE	WHAT THEY UNLOCK
BlackRock-class allocator	Sovereign-AI / regulated-industry distribution at scale
Templeton-class operator	DigitalOcean-level GTM discipline; infra-first thinking
Benchmark-class lead	Single-partner conviction, long-duration board craft
a16z-class platform	GTM scale, brand, recruiting, regulatory access
Sequoia / Founders Fund	Network effects; downstream rounds; patient capital
Strategic LP (sovereign)	Multi-year ANS infrastructure mandates

\$25–50M Series A · \$150–250M Pre-Money

We are raising \$25–50M Series A at \$150–250M pre-money. The structure gives the lead partner room to compound across the three games without forcing premature concentration on any one of them.

USE OF FUNDS

BUCKET	%	PURPOSE
ATOM GTM — sales + AEs	32%	Repeatable enterprise motion
AntimatterAI engineering	22%	Reasoning graph, governance overlay
ANS infrastructure	18%	Akamai + Blackwell capacity, edge
PhysioPS clinical + hardware	10%	Trials, certification, F1 + veteran rollouts
Marketing + brand	8%	Demand gen, analyst relations
G&A; + finance + legal	6%	Audit-defensible reporting, compliance
Reserve	4%	Strategic optionality

WHY NOW IS THE WINDOW

Gartner \$2.59T · Morgan Stanley \$805B · McKinsey 88% · Wei Li \$200B · BofA 3.9% · Gartner CFO 56%. Every macro signal is firing simultaneously. Series A pricing has expanded to reflect AI-native scaling (Sierra \$15.8B at \$100M ARR, Cognition \$26B). \$150–250M pre-money is approximately 2× the 2025 median for AI Series A — defensible given the three-game compound and 83% software-trio gross margin.

08 / HONEST COUNTER-ARGUMENTS

The Five Arguments Against Us — Answered

"Three games is one too many."

Shared infra, shared models, shared founder judgment. If we are right, marginal cost is small. If wrong, we can collapse to ATOM-only without losing institutional credibility.

"AI-SDR is crowded. 11x burned investors."

11x's controversy taxed the category for 9 months. We report TCV and contracted ARR with audit-defensible cohort data. The bar is higher — which favors disciplined operators.

"Outcome pricing is hard."

Customers buy outcomes from managed-service vendors every day. ATOM Professional's two closing deals at \$25K/mo are structured exactly this way — and the model gives us negotiating leverage on escalation.

"\$150–250M pre-money is premium."

Correct — 1.8x–3x the 2025 AI Series A median per PitchBook + Carta. We defend it on three points: multi-product holding, early ARR with 83% software-trio GM, comp set at 150–350x ARR.

"Why doesn't OpenAI eat this?"

We sell workflows, commercial framing, compliance posture, institutional reporting, and outcome accountability — not raw inference. Akamai + Blackwell gives us inference economics OpenAI cannot replicate at our agility.

09 / PATH TO UNICORN

Y3 (2028) — How We Cross \$5.7B–\$8B

YEAR	REVENUE	MULTIPLE	IMPLIED VALUE
Y1 (2026)	\$25–45M	20–30×	\$500M–\$1.35B
Y2 (2027)	\$75–130M	22–32×	\$1.65B–\$4.16B
Y3 (2028)	\$175–290M	25–35×	\$4.38B–\$10.15B · UNICORN
Y4 (2029)	\$340–520M	22–30×	\$7.48B–\$15.6B
Y5 (2030)	\$550–850M	20–28×	\$11B–\$23.8B

EXPECTED VALUE AT Y3 — ~\$6.5B

Conservative (40%): $\$175\text{M} \times 25\times = \4.4B . Base (45%): $\$235\text{M} \times 30\times = \7.05B . Aggressive (15%): $\$290\text{M} \times 35\times = \10.15B . Comp anchors: Sierra \$15.8B at \$100M ARR (May 2026); Cognition \$26B at ~\$73M ARR (May 2026); Harvey \$11B (Mar 2026); Distyl \$1.8B at \$31M ARR (Sep 2025).

10 / LIVE DEMOS

Every Pillar. Click Through.

DEMO

AntimatterAI — Core Platform

Multi-modal agentic operating layer; reasoning graph; governance overlay.
